Technologically advanced and precision engineered

Patented Retractable Screen

Every Marquis series operating window comes with a patented retractable screen system. Our technologically advanced screen rolls away when you don't need it allowing an unobstructed view and unimpeded flow of light. The roll away feature also extends the life of the screen, prevents the build-up of dirt and allergens and makes it easier to clean and operate.

Superior windows featuring retractable screens for your home

Casement and Awning

Casements open a full 90 degrees to allow cleaning from inside. Awning windows provide maximum security and resistance to wind, air and water. Used in combination with fixed windows and geometric shapes, they will fill any window opening that you may have, while enhancing the appeal of your home. Retractable screen included.

Single and Double Hung Tilt

Combining modern ventilation with traditional appearance, this popular style is easy to use and easy to clean. The maintenance free constant force balances are heavy-duty and make the sashes easy to raise and lower. Integral tilt latches make the window easy to tilt for cleaning. Retractable screen included.

Multi-point locking system for added security to resist forced entry.

Powder coated premium hardware will not corrode or rust.

Optional Features

Aluminum, brass and pewter grids are available.

Push-button cam locking system on double hung tilt and double slider lift out to resist forced entry.

White	Sandalwood
Ivory	Wicker
Pebble	Chestnut Brown

6 standard colours. Custom colours also available. Colours may not be exactly as shown.

Formula vinyl delivers lasting performance and beauty.

Multi-chamber extrusion improves structure and insulation.

Double weatherstripping ensures a tighter seal.

Night latch allows sash to stay in a fixed position (not shown).

Tilt-in sash allows for easy cleaning.

Metal-reinforced meeting rail provides added security.

Vinyl pull rail enables easier gliding of sash.

Low-E glass, warm edge spacer with argon gas for maximum energy efficiency.

Fusion-welded corners provide a more durable seal.

Retractable screen system allows you to have a screen only when you want one.

Superior windows featuring retractable screens for your home

Single and Double Slider Tilt

Whether you choose a single or double slider, our energy saving slider windows are both practical and versatile. Our slider windows are the ideal solution for openings that are greater in width than height. Cleaning is easy with a slider window. Retractable screen included.

Equal glass and Sash ensure that top and bottom grids are correctly aligned.

Co-extruded Lift Rails are durable and will not snap out. Makes it easy to open the window.

Vent locks and tilt latches allow for partial opening of sashes. Tilt latches allow easy tilting for cleaning.

Performance

All our windows are produced with state-of-the-art manufacturing processes incorporating superior engineering, materials and craftsmanship. Low-E glass, argon gas and warm edge spacer, a standard feature in all our windows, will ensure that the transfer of heat in or out of your home is reduced significantly. Our ENERGY STAR® qualified windows will save you money by reducing your energy costs up to 12 percent. In addition, they'll help keep your home comfortable all year round, reduce outside noise and depending on the amount of humidity in your home, reduce condensation in cold weather. All of our windows qualify for more than one zone in Canada. The more zones a window qualifies for the more energy efficient it is.

Triple Glaze

The triple pane glass comes as standard in our Marquis windows provides state-of-the-art insulation for the best energy efficiency, noise reduction and sun protection. Regardless of the outside temperature, triple glaze insulation will save you money on your energy bills and ensure your comfort with a durable barrier against the elements in summer and winter.

Superior Vinyl

3-1/4" UIPVC extrusions are designed to withstand the most extreme conditions. Specially formulated vinyl makes our windows highly durable and easy to maintain. Vinyl wipes clean and resists fading, peeling, chipping, rotting, denting and corrosion.

Bay and Bow

Nothing matches the dramatic effect of a bay or bow window. They add space and light, and are often used as main architectural features. They are made in combinations of casement, single hung, double hung and fixed windows to create a beautiful view.

Our bay and bow windows include all of the features of their component windows, and are sought after for their design features and their outstanding energy efficiency. They are available in many designs and configurations.

Our Lifetime Guarantee

AluminArt Windows and Doors believes in treating its customers with the highest degree of integrity by providing them with the products and services they demand, all backed by our Lifetime Warranty. We believe that AluminArt Windows and Doors commitment to quality products and exceptional service is essential to building long term relationships with our customers.
