Premium windows for your home

Single and Double Hung Tilt

Combining modern ventilation with traditional appearance, this popular style is easy to use and easy to clean. The maintenance free constant force balances are heavy-duty and make the sashes easy to raise and lower. Integral tilt latches make the window easy to tilt for cleaning. Fixed screen is included.

Casement and Awning

Casements open a full 90 degrees to allow cleaning from inside. Awning windows provide maximum security and resistance to wind, air and water. Used in combination with fixed windows and geometric shapes, they will fill any window opening that you may have, while enhancing the appeal of your home. Fixed screen included.

Fusion-welded frame and sash provide durability and water resistance.

Constant force balances are heavy-duty and never require adjusting.

Vent locks allow for partial opening of sashes. Tilt latches allow easy tilting for cleaning.

Fusion-welded frame and sash provide durability and water resistance.

Powder coated premium hardware will not corrode or rust.

Mutli-point locking system for added security to resist forced entry.

Additional Features

Folding handles for use with venetian blinds or similar window treatment.

Low-E glass, argon gas and warm edge spacer are standard features in all windows.

Optional Features

Aluminum, brass and pewter grids are available.

Push-button cam locking system on double hung tilt and double slider lift out to resist forced entry.

White	Sandalwood
Ivory	Wicker
Pebble	Chestnut Brown

6 standard colours. Custom colours also available. Colours may not be exactly as shown.

Premium windows for your home

Slider Lift Out and Slider Tilt

Whether you choose a single or double slider, our energy saving slider windows are both practical and versatile. Our slider windows are the ideal solution for openings that are greater in width than height. Cleaning is easy with a slider window. Fixed screen included.

Equal glass and Sash ensure that top and bottom grids are correctly aligned.

Continuous full interlock provides an effective air barrier.

Co-extruded Lift Rails are durable and will not snap out. Makes it easy to open the window.

Bay and Bow

Nothing matches the dramatic effect of a bay or bow window. They add space and light, and are often used as main architectural features. They are made in combinations of casement, single hung, double hung and fixed windows to create a beautiful view. Our bay and bow windows include all of the features of their component windows, and are sought after for their design features and their outstanding energy efficiency. They are available in many designs and configurations.

Superior Vinyl

3-1/4" UIPVC extrusions are designed to withstand the most extreme conditions. Specially formulated vinyl makes our windows highly durable and easy to maintain. Vinyl wipes clean and resists fading, peeling, chipping, rotting, denting and corrosion.

Performance

All our windows are produced with state-of-the-art manufacturing processes incorporating superior engineering, materials and craftsmanship. Low-E glass, argon gas and warm edge spacer will ensure that the transfer of heat in or out of your home is reduced significantly. Our ENERGY STAR® qualified windows will save you money by reducing your energy costs up to 12 percent. In addition, they'll help keep your home comfortable all year round, reduce outside noise and depending on the amount of humidity in your home, reduce condensation in cold weather. All of our windows qualify for more than one zone in Canada. The more zones a window qualifies for the more energy efficient it is.
